GitHub: [r-charan27 \(M.RAMCHARAN\)](#)

OBJECTIVE:

Artificial Intelligence & Data Science undergraduate with hands-on experience in Machine Learning, Deep Learning, and AI-driven applications across healthcare and finance. Skilled in Python, SQL, and predictive modeling with real-world internship exposure. Seeking entry-level Data Scientist / ML Engineer roles to build impactful AI solutions.

SKILLS:

Programming:	Python, SQL, Java, C.
Machine Learning:	Supervised/Unsupervised Learning, CNN, NLP, Model Evaluation, Feature Engineering.
Libraries:	Pandas, NumPy, Scikit-learn, OpenCV, Tensorflow.
Tools/Platforms:	Streamlit, Jupyter Notebook, Git, MySQL, FastAPI. GitHub, Tableau, PowerBi, VScode.
Concepts:	EDA, Data Cleaning, Visualization, Model Deployment, Android.

EDUCATION:

- **B.E – Artificial Intelligence & Data Science**
Methodist College of Engineering & Technology, Hyderabad – 2026
 - **Diploma – Electronics & Communication Engineering**
TRR College of Technology, Meerpet - 2023
-

PROJECTS:

Lung Cancer Prediction System

Tech: Python, CNN, Streamlit, ML/DL

- Developed AI-powered healthcare web app for lung cancer detection and survival prediction
- Integrated ML and deep learning models into Streamlit interface
- Achieved 86% classification accuracy

Credit Risk Modeling (Zetheta Algorithms Pvt Ltd)

Tech: Python, Excel, Financial Modeling

- Developed credit risk assessment models to evaluate borrower creditworthiness
- Built spreadsheet-based frameworks and simulation models for financial data analysis
- Analyzed repayment behavior and risk indicators

Algo Trading Bot (Finance + ML)

Tech: Python, ML, Financial Analysis

- Designed an algorithmic trading bot to analyze market trends and simulate trading strategies
- Applied ML techniques for trend prediction and strategy testing
- Combined financial knowledge with data-driven modeling

Nexus Mind – Agentic AI Orchestration Platform(Ongoing)

Tech: Python, FastAPI, LLMs

- Building multi-agent AI orchestration platform
- Designing modular architecture for workflow automation
- Integrating LLM-based task execution

PROFESSIONAL EXPERIENCE:

Algo Risk Developer – Zetheta Algorithms Pvt Ltd: (Ongoing,Remote)

- Developed credit risk evaluation frameworks
- Conducted simulation-based risk assessments

Data Analyst & M.L Intern – Elevate Labs: (Apr 2025-Jun 2025, Remote)

- Performed EDA and data preprocessing using Python & SQL.
- Created visual reports and business insights , Metrics: Achieved 86% model accuracy.
- Recognized as Best Performer

Data Science Intern – Oasis Infobyte Solutions: May 2025-Jun 2025 (Remote)

- Built ML classification and regression models, worked on 5k+ row real world data points.
- Conducted feature engineering and model evaluation, Metrics: Achieved 88% model accuracy.
- Star Performer + Letter of Recommendation

CERTIFICATIONS:

- IBM – AI in Healthcare
- Machine Learning Internship – Elevate Labs
- Machine Learning with Python – Simplilearn
- BCG GenAI Simulation – Forage
- Accenture Data Analytics Simulation – Forage
- Cisco IoT, Networking ,& Python Certification
- Hackathon Finalist (36-hour Hackathon Spoorthy College of Engineering & Technology).

ACHIEVEMENTS:

- Best Performer – Elevate Labs.
- Star Performer – Oasis Infobyte Solutions.

SOFT SKILLS:

- Problem Solving
- Analytical Thinking
- Team Collaboration
